Profiles 2021 State Report

The Commission for Educational Quality and Accountability and Office of Educational Quality and Accountability (OEQA) strive to provide the most timely and comprehensive information regarding Oklahoma’s public schools. The *State Profiles* is an annual report aggregating many of the Oklahoma Educational Indicators Program’s statistics to the state level. Per §70-1210.531, the *State Profiles* delivers, “A summary report to the people and Legislature of Oklahoma of the information provided by the Oklahoma Educational Indicators Program.”

The Oklahoma Educational Indicators Program provides school site, district, state, and national educational statistics derived from a number of sources. These sources include the Census Bureau’s American Community Survey, Oklahoma State Department of Education (OSDE), Oklahoma Tax Commission, Oklahoma State Regents for Higher Education (OSRHE), Oklahoma Department of Career and Technology Education, Oklahoma Office of Juvenile Affairs, National Center for Education Statistics, ACT, Inc., The College Board, and all Oklahoma public schools. This program has proven to be vital to parents, researchers, grant writers, school administrators, legislators, and the general public.

The state, district, and site-level profiles are located on our website. Please visit <https://www.edprofiles.info> to view or download these profiles.

The following pages contain tables and maps that provide data at the state, county, and national level for historical and comparative purposes. Many of these data were collected during the 2020-2021 school year, which is the most current, comprehensive, and complete reporting cycle. However, some statistics are derived from multi-year averages or periodic snapshots. In some cases, comparisons are not necessarily appropriate because of the differences in sample sizes. The definitions, methodologies, and sources used to create the site, district, and state profiles can be found here: <https://www.edprofiles.info/oeip-exp>
